

## INSTALLER - JOB DESCRIPTION

Milron specializes in designing, fabricating, assembling and installing high-quality aluminum service bodies for commercial vehicles. We are committed to delivering top-notch products and services to our customers.

As an Installer, you will be responsible for efficiently and accurately installing aluminum service bodies on commercial vehicles. We value expertise and professionalism, and many of our installers hold journeyman tickets in heavy-duty mechanical and electrical trades, along with extensive automotive knowledge of truck body installations and customization.

### ***Key Duties and Responsibilities:***

1. Aluminum Service Body Installation: Safely and accurately install aluminum truck bodies on commercial vehicles, following company standards and customer specifications.
2. Customization: Modify and customize truck bodies to meet customer requirements, such as adding specialized compartments, toolboxes, shelving, or other accessories.
3. Electrical System Integration: Install and integrate electrical systems, including lighting, wiring, switches, and controls, ensuring proper functionality and compliance with safety standards and customer specifications.
4. Mechanical Integration: Integrate mechanical components, such as hydraulic systems, lift gates, ramps, or other specialized equipment, ensuring proper alignment and operation.
5. Precision Alignment: Align truck bodies with the chassis, ensuring proper fitment, clearance, and structural integrity.
6. Fastening and Securing: Secure truck bodies to the chassis using appropriate fasteners, brackets, and mounting hardware, ensuring stability and durability.
7. Quality Assurance: Conduct thorough inspections of the installed truck bodies, checking for proper fit, finish, alignment, and functionality. Address any issues or deficiencies promptly.
8. Troubleshooting: Identify and resolve installation-related issues or challenges, working collaboratively with other team members to find effective solutions.
9. Documentation: Maintain accurate records of installations, including measurements, specifications, modifications, and any additional work performed. Report to supervisor and sales.
10. Safety Compliance: Adhere to all safety regulations and guidelines, including proper use of personal protective equipment (PPE) and participation in safety training programs.
11. Customer Interaction: Communicate professionally with customers, addressing any concerns or questions related to the installation process, providing excellent customer service.

12. Team Collaboration: Collaborate with other installers, designers, fabricators, and supervisors to ensure smooth workflow, timely completion of projects, and adherence to quality standards.
13. Continuous Learning: Stay updated with industry trends, new technologies, and best practices related to truck body installations, and proactively share knowledge with the team.

### **Qualifications and Skills:**

- Journeyman ticket in a relevant trade, such as automotive, heavy-duty mechanical or electrical, and/or automotive is strongly preferred for certain senior positions.
- Experience and knowledge in truck body installations and customization is an asset for entry level positions.
- Proficient in reading and interpreting technical drawings, blueprints, and electrical schematics.
- Strong mechanical aptitude and problem-solving skills.
- Excellent understanding of safety practices and procedures in a workshop environment.
- Detail-oriented with a focus on precision and quality.
- Strong communication and interpersonal skills.
- Ability to work independently and as part of a team, managing multiple projects simultaneously.
- Physical fitness to handle the demands of the job, including lifting heavy objects and working in various positions.
- Valid driver's license and acceptable drivers abstract.
- Physical fitness to perform tasks that involve standing, bending, and lifting up to 50 pounds.
